EDUCATION

California State University, Northridge Spring 2018
Bachelor of Science, Computer Science
GPA: 3.1

PROJECTS

Kids Play [Senior Design Project]

Social networking application built in Ionic, designed to facilitate social interaction among children in communities. My main responsibility was the tracking feature which used ionic geolocation, firebase, and the google maps API. Current features include real-time tracking, travel history, and proximity. Also served as SCRUM Master for our 5-7-member team over the course of two semesters.

Rhythm Runner

Auto-scrolling platformer built in unity. Players must jump with the music to collect coins and avoid obstacles. I created level one as well as scripts for the game.
